

Navigation for Sidestage

Landing/login screen

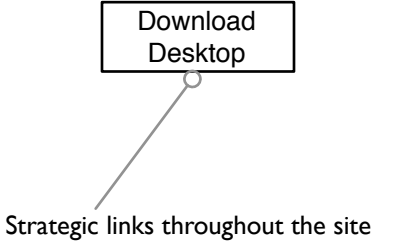

For Sidestage, the home page should simply be a version of the RIPL player with several links to site features and promotional material about downloading the desktop application.

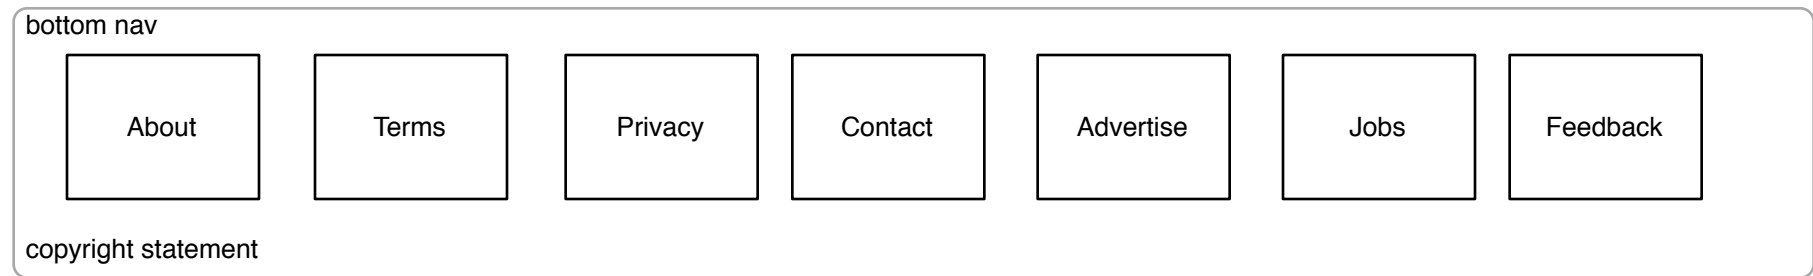

Player settings

This section is currently a home page module, and could remain such for sidestage if the resources for changing it aren't there

First page of help goes to "getting started" guide.

Settings for Player are managed within the module itself - this is not a separate page.

Order of these links is TBD.
